Project Title: DocuSign Integration

Date: 10/17/2021

## Members:

-Justin Rule –

-Ale Groe -

-Jack Goldsworth -

-Alan Zapinski -

-Carson Meyer -

-Joe Slater -

-Conley McKown -

## What we've accomplished in the past week/what we've been researching

-Justin Rule – Researched DocuSign's API platform as well as various costs/features of each level of their service. Used BuilderTrend's desired use cases to develop the design plan.

-Ale Groe - Figuring out faculty advisor communication. Worked on design document and lightning talk.

-Jack Goldsworth - Worked on our design document. Worked with DocuSign to develop a strategy for our implementation.

-Alan Zapinski - Worked on our design document. Looked at how API can be used to meet Buildertrend's specific requirements

-Carson Meyer - Signed up for the DocuSign API, and have started working on research with the API. Learning terminology for DocuSign.

-Joe Slater - Researched DocuSign API, worked on design assignment

-Conley McKown - Worked on Design Assignment

## What we're planning to do in the coming week

-Justin Rule – Testing + solidifying our design and continuing to research DocuSign's API

-Ale Groe - Set up meeting with faculty advisor hopefully after they get back to us

-Jack Goldsworth - Discovering more functionality that we can implement by using the DocuSign API.

- Alan Zapinski - Continue researching DocuSign API. Potentially try setting up some small tests with their API
- Carson Meyer - Start documentation part of project, get small examples working, start working on the tech
- Joe Slater - Work with small examples, continue to finalize design
- Conley McKown - Working on the Testing assignment

### Issues we had in the previous week

- Justin Rule – BuilderTrend has not responded to our requests to their project description document which includes more detailed use cases
- Ale Groe - Faculty advisor has not responded to either emails and we had to escalate the issue. We also don't have access to documents BuilderTrend said they would send.
- Jack Goldsworth - Faculty advisor has not responded at all to our emails, and BuilderTrend hasn't delivered the documents promised to us.
- Alan Zapinski - We are still missing Buildertrend's requirements and use cases document, so any previous work regarding these were based on notes from our meeting/what we remember.
- Carson Meyer - Nothing outside of what was already mentioned.
- Joe Slater - Previously mentioned items ^
- Conley McKown - N/A
